What's New at Martha & Mary!

We are excited to report, construction is underway on the first floor of the Martha & Mary Health Services building in Poulsbo! This will be the future, new **Martha & Mary Kids Child Care and Learning Center**.

Currently **Martha & Mary Kids** provides care to over 115 children daily at the two Poulsbo childcare locations. These locations provide care for infant to pre-school aged children. This new **Child Care and Learning Center** will allow us to provide care to over 175 children.

Bringing the children under the same roof as our seniors lends to countless future opportunities for structured fun and engagement of the aged population and our youth. We hope that in the future, the children and seniors will enjoy arts & crafts, playing games, gardening and singing together. This endeavor allows for beautiful, unique and mutually beneficial experiences for all. It keeps our aged young at heart and nurtures wisdom and compassion in growing children.

There is a growing need for child care in the Kitsap community and **Martha & Mary** is here to answer that calling. For our families in our community or to provide care for the children of our amazing staff, we are excited to share the roof top with both seniors and children.

If you have any questions about this new endeavor or would like to support this project, please email: info@mmhc.org or call 360.779.7500.

Thank you!
