

May 2022

The first floor of the Martha & Mary Health Services building, previously a place of care and healing for seniors is being transformed into a place for learning, nurturing, caring and growing for the children of Kitsap County.

The walls that once provided private rooms for seniors have been removed to create bright, spacious classrooms. The solid doors that once provided quiet and solitude are being replaced with tempered glass, windowed barn doors so those short and tall can clearly see through.

Like a time capsule, peeling back the walls and prepping the floors have revealed some of the history of Martha & Mary. Primarily of colors and finishes of days past. From the bright chartreuse green layers of paint to pastel floral wallpapers, we have had fun remembering the past with this part of our journey.

The days ahead will be filled with new flooring, paint, installation of tiny toddler toilets, sinks and so much more. With our many years of child care experience, we are confident we are creating a space children and their families will love being a part of for many years to come.

If you have any questions about this exciting endeavor or would like to support this project, please email: info@mmhc.org or call 360.394.4065. Thank you!
